Texas Radiotherapy to Host Zero Prostate Cancer Run/Walk

FORT WORTH--Texas Radiotherapy, a leading radiation oncology practice in Fort Worth, Texas, is hosting the ZERO® Prostate Cancer 5k and 1 mile Run/Walk in Fort Worth at 8 a.m. on October 28, 2023.

The run/walk benefits prostate cancer research and patient support programs through the non-profit ZERO Prostate Cancer.

Dr. Matthew Cavey, founder and lead radiation oncologist of Texas Radiotherapy, stated, "Our team looks forward to hosting the ZERO Prostate Cancer Run/Walk. Prostate cancer affects more men than most of us realize. One in eight men will be diagnosed with prostate cancer in their lifetime. In the DFW area, that means that almost 750,000 men will receive a prostate cancer diagnosis."

Dr. Cavey added, "The run/walk will be a great, outdoor activity to connect patients, families, friends and caregivers. As well, I will be on-hand to talk to patients and caregivers, and there will be PSA tests available free-of-charge for men over 45. PSA tests are critical in the early detection of prostate cancer."

The ZERO Prostate Cancer Run/Walk location is Trinity Park: 826 Trinity Park Drive, Fort Worth, Texas, 76107 (near shelter house 1). More information can be found at <https://texasradiotherapy.com/zero-out-prostate-cancer/>.

Texas Radiotherapy is a radiation oncology center focused on providing every patient with an individualized, world-class, treatment plan. Texas Radiotherapy is in Fort Worth at Texas Health Harris Methodist Hospital. To learn more about Dr. Cavey and his team, visit www.TexasRadiotherapy.com.

ZERO Prostate Cancer is the leading national nonprofit with the mission to end prostate cancer and help all who are impacted. More information can be found www.zerocancer.org.
