Texas Radiotherapy Celebrates Five Years of Prostate Cancer Care

(Fort Worth, Texas) – Texas Radiotherapy announces its milestone, fifth anniversary. Over the past five years, Texas Radiotherapy has completed over 10,000 procedures and cared for over 2,500 cancer patients; 2,000 of those for prostate cancer.

Founded by Dr. Matthew Cavey, Radiation Oncologist, and his wife, Sara Cavey, Director of Operations, Texas Radiotherapy is recognized as delivering personalized, state-of-the-art radiation oncology care. Dr. Cavey specializes in prostate cancer care utilizing both low dose rate brachytherapy (the gold standard in prostate cancer treatment) and MR fusion transperineal biopsies: very advanced, accurate prostate biopsies.

Over the past five years, Texas Radiotherapy expanded patient access to breast surgical oncology by establishing Breast Associates of Texas, invested in advanced treatment technologies, and earned the trust of patients and referring physicians throughout the greater Texas region.

Reflecting on the milestone, Dr. Matthew Cavey said, "I'm gratified to celebrate Texas Radiotherapy's fifth year in caring for cancer patients. When we opened Texas Radiotherapy, our goal was to put our patients' needs first and get to know each patient, treating them like family."

Dr. Cavey added, "Additionally, this year, I am pleased to celebrate my 20th year as a radiation oncologist. Throughout my career, my family has supported me in my profession by allowing me to spend optimal time with each patient. I am grateful for the sacrifice of each of my family members."

Sara Cavey, reflected on the practice's mission and growth over the past five years, "Matt and I wanted to create a special place where cancer patients could receive exceptional, personalized care in an atmosphere that is positive and uplifting. I believe that commitment makes Texas Radiotherapy unique. We look forward to our next five years."

###

About Texas Radiotherapy

Texas Radiotherapy, located at Texas Health Fort Worth, provides caring, patient-centered cancer treatment. Its team of highly trained medical professionals in radiation oncology offers expert care for prostate, breast, and other cancers that benefit from radiation therapy. Along with Dr. Matthew Cavey's 20 years of experience, Texas Radiotherapy's clinical staff has more than 100 years of combined experience. Texas Radiotherapy utilizes cutting edge technologies, including some of the world's most advanced radiation therapies, to improve outcomes, reduce side effects, and shorten treatment times. Texas Radiotherapy is committed to providing state-of-the-art cancer treatment while delivering an exceptional patient experience.
